

Where the Conversion Leaks Are

allbirds.com · CRO Recommendations · August 2026

The site's most valuable conversion mechanism is guiding visitors from the hero to a single, high-intent product collection, but the hero's dual CTAs and vague copy dilute focus, while hidden shipping costs and lack of social proof on product pages undermine trust and increase friction.

#	Finding	Severity	Effort	PXL
1	Competing primary CTAs The hero presents two equally prominent CTAs (SHOP MEN and SHOP WOMEN) that split user focus and delay the...	Urgent	Medium	5/10
2	Vague hero copy The hero headline and subhead are abstract and feature-led, failing to connect with the visitor's intent to...	Urgent	Low	5/10
3	Missing H1 and description The Shop All page lacks an H1 and meta description, leaving visitors without clear orientation or SEO...	High	Medium	5/10
4	Single-field email capture The homepage email capture form asks only for an email address, which is minimal and frictionless, but it...	High	Medium	5/10
5	No social proof The hero lacks any review count or rating, so first-time visitors cannot immediately validate the brand's...	High	Medium	5/10
6	Mega-menu choice overload The mega-menu presents 20+ items with multiple nested categories, risking choice overload and decision...	High	Medium	5/10
7	Hero CTA ambiguity The hero CTAs 'SHOP MEN' and 'SHOP WOMEN' are gender-specific, potentially alienating non-binary or...	High	Medium	5/10
8	Hidden cost: shipping threshold The product page shows a \$10 price but does not disclose the \$5 shipping fee or the \$100 free-shipping...	Urgent	Medium	4/10
9	Out-of-stock notification form The product page for the Anytime Ankle Sock shows a 'Get Notified' CTA, indicating the product is out of...	High	Medium	4/10

#	Finding	Severity	Effort	PXL
10	No guarantee near CTA The product page lacks a visible guarantee or return policy near the add-to-cart button, leaving purchase...	High	Medium	4/10

How to read this

Findings marked **verified** were measured directly and are reproducible. Everything else is a hypothesis derived from inspecting the live pages, which is why the PXL evidence questions score zero for those items. Sized opportunities describe the prize if a change works, not expected revenue: roughly 10–30% of A/B tests produce a significant win, and winners tend to overstate their true effect.
